

**Innovalt N400****Section 1 - Product and Company Identification**

<b>Material Name</b>	▪ <b>Innovalt N400</b>
<b>CAS Number</b>	▪ 8017-16-1
<b>EINECS</b>	▪ 232-417-0
<b>Molecular Formula</b>	▪ $H(PO_3H)_nOH$
<b>Product Description</b>	▪ Colorless to dark grey viscous liquid with no odor.
<b>Synonyms</b>	▪ Polyphosphoric acid; Tetrphosphoric acid
<b>Manufacturer</b>	▪ Innophos PO Box 8000 259 Prospect Plains Road Cranbury, NJ 08512-8000 United States
<b>Telephone</b>	
<b>Technical</b>	▪ 609-495-2495
<u><b>Emergency</b></u>	▪ 800-424-9300 - Chemtrec
<u><b>Emergency</b></u>	▪ 615-386-7816 - Innophos Emergency Communication Team (ECT)
<u><b>Emergency</b></u>	▪ 703-527-3887 - Chemtrec - International Collect Calls
<b>Preparation Date</b>	▪ 05/02/2007
<b>Last Revision Date</b>	▪ 10/25/2010

**Section 2 - Hazards Identification****Emergency Overview****DANGER**

Causes severe skin burns and eye damage. May be corrosive to metals.

<b>Prevention</b>	Do not breathe dust, fume, gas, mist, vapours and/or spray. Wear protective gloves, clothing, and eye/face protection - Face Shield & Eye Protection. Wash thoroughly after handling.
<b>Response</b>	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician.
<b>Storage/Disposal</b>	Store locked up. Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.

**OSHA  
WHMIS**

- Corrosive
- Class E - Corrosive materials

**EU**

- Corrosive - C  
R35

**GHS**

- Corrosive to Metals - Category 1, Skin Corrosion/Irritation - Category 1A, Serious Eye Damage, Eye Irritation - Category 1

**Route Of Entry  
Medical Conditions  
Aggravated by Exposure**

- Inhalation, Skin, Eye, Ingestion
- Skin, Lungs

**NFPA:**

**Potential Health Effects**

**Inhalation**

**Acute (Immediate)  
Chronic (Delayed)**

- May cause corrosive burns - irreversible damage.
- Repeated or prolonged exposure to corrosive fumes may cause bronchial irritation with chronic cough.

**Skin**

**Acute (Immediate)  
Chronic (Delayed)**

- Causes severe skin burns and eye damage.
- Repeated or prolonged exposure to corrosive materials will cause dermatitis.

**Eye**

**Acute (Immediate)  
Chronic (Delayed)**

- Corrosive. Can cause permanent damage to the cornea, blindness.
- Repeated or prolonged exposure to corrosive materials or fumes may cause conjunctivitis.

**Ingestion**

**Acute (Immediate)  
  
Chronic (Delayed)**

- Causes corrosion, burns to mouth and esophagus, abdominal pain, chest pain, nausea, vomiting, diarrhea, seizures. Aspiration of the swallowed or vomited product can cause severe pulmonary complications.
- Repeated or prolonged exposure to corrosive materials or fumes may cause gastrointestinal disturbances.

**Carcinogenic Effects**

- This product does not contain any ingredient designated by IARC, NTP, ACGIH or OSHA as probable or suspected human carcinogens.

## Section 3 - Composition/Information on Ingredients

Hazardous Components						
Chemical Name	CAS	%(weight)	UN;EINECS	LD50/LC50	EU Classification & R Phrases	Other
Polyphosphoric acid	8017-16-1	> 99%	232-417-0	NDA	NDA	NDA

According to the Globally Harmonized Standard for Classification and Labeling (GHS) this product is considered hazardous. Under United States Regulations (29 CFR 1900.1200 - Hazard Communication Standard), this product is considered hazardous. In Canada, the product mentioned above is considered hazardous under the Workplace Hazardous Materials Information System (WHMIS). This product is considered dangerous according to the European Directive 67/548/EEC.

## Section 4 - First Aid Measures

- Inhalation**
- Administer oxygen if breathing is difficult. Do not use mouth-to-mouth method if victim inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Give artificial respiration if victim is not breathing. Move victim to fresh air.
- Skin**
- For minor skin contact, avoid spreading material on unaffected skin. In case of contact with substance, immediately flush skin with running water for at least 20 minutes. Wash skin with soap and water. Remove and isolate contaminated clothing and shoes. Wash contaminated clothing before reuse.
- Eye**
- In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. Seek immediate medical attention, preferably with an ophthalmologist. If the physician is not immediately available, eye irrigation should be continued for an additional 20 minutes. If it is necessary to transport the patient to a physician and the eye needs to be bandaged, use a dry sterile cloth pad and cover both eyes.
- Ingestion**
- If swallowed give 2-3 glasses of water if victim is conscious and alert. Do not give anything by mouth to an unconscious person. Do NOT induce vomiting. Obtain medical attention immediately if ingested. Do not use mouth-to-mouth method if victim ingested the substance. Do not leave victim unattended. To prevent aspiration of swallowed product, lay victim on side with head lower than waist. Persons attending the victim should avoid direct contact with heavily contaminated clothing and vomitus. Wear impervious gloves while decontaminating skin and hair.
- Notes to Physician**
- All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.
- Other Information**
- Call 911 or emergency medical service. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Keep victim warm and quiet.

## Section 5 - Fire Fighting Measures

- Extinguishing Media**
- Not combustible. Use extinguishing media suitable for surrounding fire.
- Unsuitable Extinguishing Media**
- None known.
- Firefighting Procedures**
- Keep unauthorized personnel away.  
Dike area to prevent runoff and contamination of water sources. Dispose of fire control water later. Evacuate residents who are downwind of fire. Persons who may have been exposed to contaminated smoke should be immediately examined by a physician and checked for symptoms of poisoning. The symptoms should not be mistaken for heat exhaustion or smoke inhalation.
- Unusual Fire and Explosion Hazards**
- Not combustible. Under fire conditions, toxic, corrosive fumes are emitted.
- Hazardous Combustion Products**
- Non-combustible, substance itself does not burn but may decompose upon heating to produce corrosive fumes.

## Protection of Firefighters

- Structural firefighters' protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations where direct contact with the substance is possible.  
Wear chemical protective clothing that is specifically recommended by the manufacturer. It may provide little or no thermal protection.  
Wear positive pressure self-contained breathing apparatus (SCBA).

## Section 6 - Accidental Release Measures

### Personal Precautions

- Ventilate enclosed areas. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

### Emergency Procedures

- Keep unauthorized personnel away. Dike spill using absorbent or impervious materials such as earth, sand or clay. Dike or retain dilution water or water from firefighting for later disposal.

### Environmental Precautions

- Prevent entry into waterways, sewers, basements or confined areas.

### Containment/Clean-up Measures

- Exercise caution during neutralization as considerable heat may be generated. Neutralize spill area with soda ash, sodium bicarbonate or lime. Flush neutralized spill with copious amounts of water.

### Prohibited Materials

- None known.

## Section 7 - Handling and Storage

### Handling

- Do not get on skin or in eyes. Avoid breathing vapors and mists. Do not ingest. Handle and open container with care. Use only with adequate ventilation. Use caution when combining with water; DO NOT add water to corrosive liquid, ALWAYS add corrosive liquid to water while stirring to prevent release of heat, steam and fumes.

### Storage

- Keep away from incompatible materials. Store locked up. Keep container/package tightly closed in a cool, well-ventilated place. Ventilate enclosed areas. Storage tanks, pipes and pumps should be equipped with external heating and insulation to maintain at or above minimum storage temperature. This material is corrosive to common metals such as mild steel, copper, brass and bronze and may generate flammable hydrogen gas as a result of this reaction.

### Special Packaging Materials

- Recommended container material: stainless steel (Type 316ELC) with corrosive resistant inner liner.

### Incompatible Materials or Ignition Sources

- This material is corrosive to common metals such as mild steel, copper, brass and bronze. Reacts with water to generate heat and forms phosphoric acid. The reaction is not violent.

## Section 8 - Exposure Controls/Personal Protection

### Personal Protective Equipment

#### Pictograms

#### Respiratory

- Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

#### Eye/Face

- Wear face shield and eye protection. Wear splash goggles. An emergency eye wash must be readily accessible to the work area.

#### Hands

- Wear protective gloves selected with regard to both durability as well as permeation resistance.

#### Skin/Body

- Wear protective clothing -Full Body Suit

### General Industrial Hygiene Considerations

- Do not get in eyes or on skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Handle in accordance with good industrial hygiene and safety practice.

### Engineering Measures/Controls

- Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.
