

STATEMENT TO CUSTOMERS AND SUPPLIERS REGARDING SUPPLY AVAILABILITY

Innophos continues to actively assess developments relating to the COVID-19 pandemic in order to be best positioned to take all reasonable and responsible steps to ensure an adequate supply of our essential ingredients to our customers.

Our products are essential ingredients for food and beverage, nutrition, pharmaceutical and personal care products, water treatment, industrial and household cleaning products and detergents, nutrient fortification for farming of essential crops, and critical infrastructure and environmental safety applications. Consistent with the U.S. Federal Government's March 16th updated Coronavirus Guidance for America and similar guidance issued by other governmental authorities, as a supplier that operates in a critical infrastructure industry, we plan to continue to operate our business so long as we are able to continue operations in a manner that is compliant with evolving regulations and that ensures the safety of our employees, contractors and other constituents.

We will continue to assess whether we are permitted, as a supplier that operates in a critical infrastructure industry, to continue to operate during any existing or future curfew, shelter-in-place orders, or other measures issued by governmental authorities. We also ask that our suppliers likewise continue to assess their ability to legally and responsibly operate and supply raw materials to Innophos and to update Innophos accordingly.

Please refer to correspondence dated 3/22/2020 from our CEO, Richard Hooper, in which we set forth the measures we have taken to ensure the safety, quality and availability of our products and protect the health and safety of our employees, customers, suppliers and partners. We continue to develop and implement protocols consistent with our long-standing safety and health practices.

We will continue to update our suppliers and customers accordingly, as developments continue to evolve.

If you have specific questions regarding our company and operations, please reach out to your Innophos contact to discuss. Additional information is available on www.innophos.com.
