Section 2 - Hazards Identification

Emergency Overview

WARNING
May cause respiratory irritation. Causes skin irritation. Causes serious eye irritation.

Prevention
Avoid breathing dust, fume, gas, mist, vapours and/or spray. Wear protective gloves, clothing, and eye/face protection. Wash thoroughly after handling.

Response
IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If skin irritation occurs: Get medical advice/attention. Wash with plenty of soap and water. Take off contaminated clothing and wash before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.

Storage/Disposal
Dispose of content and/or container in accordance with local, regional, national, and/or international regulations.
OSHA
- Irritant

WHMIS
- Class D - Poisonous and Infectious Materials - Division 2 - Subdivision B

EU
- Irritant - Xi
  R36/37/38

GHS
- Specific Target Organ Toxicity Single Exposure - Category 3, Skin Corrosion/Irritation
  - Category 2, Serious Eye Damage, Eye Irritation - Category 2A

Route Of Entry
Medical Conditions Aggravated by Exposure
- Inhalation, Skin, Eye, Ingestion/Oral
- Disorders of the lungs

NFPA:

Potential Health Effects

Inhalation
- Acute (Immediate)
  - May cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.

- Chronic (Delayed)
  - No data available.

Skin
- Acute (Immediate)
  - May cause irritation.

- Chronic (Delayed)
  - No data available.

Eye
- Acute (Immediate)
  - May cause irritation.

- Chronic (Delayed)
  - No data available.

Ingestion
- Acute (Immediate)
  - Low acute oral toxicity. Ingestion of large quantities may cause abdominal pain, abdominal cramps, nausea, vomiting, diarrhea.

- Chronic (Delayed)
  - No data available.

Potential Environmental Effects
- No specific biodegradation test data located. While the alkalinity of this material is readily reduced in natural waters, the resulting phosphate may persist indefinitely or incorporate into biological systems.

Section 3 - Composition/Information on Ingredients
Under United States Regulations (29 CFR 1900.1200 - Hazard Communication Standard), this product is considered hazardous. In Canada, the product mentioned above is considered hazardous under the Workplace Hazardous Materials Information System (WHMIS). This product is considered dangerous according to the European Directive 67/548/EEC. According to the Globally Harmonized Standard for Classification and Labeling (GHS) this product is considered hazardous.

### Section 4 - First Aid Measures

**Inhalation**
- Move victim to fresh air. Administer oxygen if breathing is difficult. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.

**Skin**
- IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse.

**Eye**
- Flush eyes with water for at least 15 minutes while holding eyelids open. Remove contact lenses if worn. If eye irritation persists: Get medical advice/attention.

**Ingestion**
- Do NOT induce vomiting. Do not give anything by mouth to an unconscious person. Rinse mouth. Vomiting may occur spontaneously. To prevent aspiration of swallowed product, lay victim on side with head lower than waist. If vomiting occurs and the victim is conscious, give water to further dilute the chemical.

**Notes to Physician**
- All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred. Ingestion of large quantities of phosphate salts (over 1.0 grams for an adult) may cause an osmotic catharsis resulting in diarrhea and probable abdominal cramps. Larger doses such as 4-8 grams will almost certainly cause these effects in everyone. In healthy individuals most of the ingested salt will be excreted in the feces with the diarrhea and, thus, not cause any systemic toxicity. Doses greater than 10 grams hypothetically may cause systemic toxicity. Treatment should take into consideration both anionic and cation portion of the molecule.

### Other Information
- Call 911 or emergency medical service. Ensure that medical personnel are aware of the material(s) involved, take precautions to protect themselves and prevent spread of contamination.

### Section 5 - Fire Fighting Measures

**Extinguishing Media**
- Not combustible. Use extinguishing media suitable for surrounding fire.

**Unsuitable Extinguishing Media**
- None known.

**Firefighting Procedures**
- LARGE FIRES: Move containers from fire area if you can do it without risk. LARGE FIRES: Do not scatter spilled material with high pressure water streams. LARGE FIRES: Dike fire-control water for later disposal.

**Unusual Fire and Explosion Hazards**
- Non-combustible.

**Hazardous Combustion Products**
- Oxides of sodium, oxides of phosphorus.

**Protection of Firefighters**
- Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.
Section 6 - Accidental Release Measures

Personal Precautions
- Do not touch or walk through spilled material.

Emergency Procedures
- Keep unauthorized personnel away.

Environmental Precautions
- LARGE SPILLS: Prevent entry into waterways, sewers, basements or confined areas.

Containment/Clean-up Measures
- Avoid generating dust.
  - SMALL DRY SPILLS: With clean shovel place material into clean, dry container and cover loosely; move containers from spill area.
  - LARGE SPILLS: Cover powder spill with plastic sheet or tarp to minimize spreading.
- Clean up residual material by washing area with water. Collect washings for disposal. Decontaminate tools and equipments after cleanup.

Prohibited Materials
- None known.

Section 7 - Handling and Storage

Handling
- Keep containers closed when not in use. Avoid breathing dust. Avoid direct or prolonged contact with skin and eyes. Do not ingest. Do not use in areas without adequate ventilation.

Storage
- Store in a tightly closed container. Product is hygroscopic and tends to cake on storage. Store in an area that is cool, dry and isolated from all toxic and harmful substances.

Special Packaging Materials
- None known.

Incompatible Materials or Ignition Sources
- Strong bases, oxidizing agents.

Section 8 - Exposure Controls/Personal Protection

Personal Protective Equipment

Pictograms

Respiratory
- For limited exposure use an N95 dust mask. For prolonged exposure use an air-purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149. Use a NIOSH/MSHA or European Standard EN 149 approved respirator if exposure limits are exceeded or symptoms are experienced.

Eye/Face
- Wear safety glasses.

Hands
- Wear appropriate gloves.

General Industrial Hygiene Considerations
- Do not use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored. Wash hands and face carefully before eating, drinking, using tobacco, applying cosmetics, or using the toilet.

Engineering Measures/Controls
- Adequate ventilation systems as needed to control concentrations of airborne contaminants below applicable threshold limit values.
